PRINCETON, WV 24740

ARCHITECT: None

CONTACT: 304-425-9525

CONTRACT : NOT DISCLOSED

TIME PERIOD: 06-2008 THRU 08-2008

DESCRIPTION: Main Street Builders, LLC was called to replace the main wall and foundation of the loading dock area. Work involved demolishing the existing brick wall, demolishing the foundation and demolishing electrical work. In order to replace the wall, MSB had to drill 4- 3'x9' caissons for the new structural beams to sit on. A new footer and form wall was poured, new electrical work was installed and a new Butler Kynar finish sheet metal wall was implemented on the exterior section of the wall. All this work was caused by a faulty downspout and downspout drain.
